- React Testing Library
- Jest
- Cypress
- WCAG and Accessibility
- Git / Github
- Cross Browser Testing
- Agile Methodology

### WORK EXPERIENCE

#### FRONT END SOFTWARE ENGINEER

Coterie Insurance

August 2021 - Present

- Modernizing insurance software by creating well tested, and accessible UI components and systems using Typescript, React, Redux, Jest, and Cypress.
- Leading a complex front end internal tooling project by planning effectively, writing clear maintainable code, and crafting thorough documentation.
- Leading efforts to ensure that accessibility is at the forefront of the user experience.

#### FRONT END SOFTWARE ENGINEER

Brushfire

February 2021 - August 2021

- Utilized Typescript, React, and Firebase to craft intuitive and performant event management and live-streaming solutions.
- Utilized .NET MVC to ensure a clean, organized, and efficient data flow throughout a complex application.
- Crafted an automated pre-commit code quality solution for a complex multi-language mono-repo.

#### FRONT END SOFTWARE ENGINEER

Bluetoad Inc.

August 2019 - July 2020

- Refactored existing legacy code into modern reusable components using React.
- Engineered WCAG compliant features to ensure a fully accessible experience for all users.
