

Cailey Miller

Senior Front End Software Engineer | Technical Lead | Accessibility Specialist

caileymillerdev@gmail.com | Greenville, SC USA | <https://cailey.dev/>

WORK EXPERIENCE

Fieldtech | Senior Front End Software Engineer | Tech Lead Manager

May 2023 - May 2026

- **Led UI architecture, design, and development** for a scaling insurtech platform using a core toolset of React, TypeScript, Vite, and GraphQL.
- **Led and managed a team of front-end engineers** by providing empathetic and high-quality code reviews, pair programming sessions, regular feedback and bi-annual performance reviews, and career guidance.
- **Introduced and enforced WCAG AA+ accessibility standards** across all applications by providing regular audits, providing remediation instruction, remediating faulty code and UX design, and baking baseline accessibility confirmation into automated e2e and unit tests.
- **Collaborated directly with design, product, and executives** to bridge the gap between ideation and implementation.
- **Designed, built, and launched a platform agnostic feature rich data table library** from scratch - replacing 30+ deprecated third-party tables and unifying UX across multiple products.
- **Modernized complex form flows** by refactoring legacy logic using React Hook Form with schema based validation, vastly improving performance, maintainability, and developer experience.
- **Led development of LLM integrated greenfield UI POCs** that were adopted as core product offerings - a context aware drop in chatbot widget and an AI assisted bulk data processing application for agency admins.

Coterie Insurance | Front End Software Engineer

August 2021 - September 2022

- **Authored and launched a modern domain-specific language (DSL) UI**, enabling underwriters to create error-free rule logic with limited syntax knowledge.
- **Increased WCAG compliance adoption** by helping establish and enforce accessibility standards across design and engineering.
- **Core greenfield UI developer for a successfully launched mission critical application** that provides insurance agents with a data intelligent “2 click” quote flow.
- **Mentored peer engineers** by pairing and reviewing code, and holding monthly 1:1s with junior developers to provide career guidance and encourage technical growth.

Brushfire | Front End Software Engineer

February 2021 - August 2021

- **Modernized a legacy C# Razor / jQuery livestreaming and event management platform** with React, Redux, Typescript, and Firebase.
- **Crafted an automated pre-commit code quality enforcement solution** for a complex multi-language mono-repo.

Blue Toad | Front End Software Engineer

August 2019 - July 2020

- **Engineered digital publication UI features and responded to bug reports** using React, jQuery, and Javascript.
- **Remediated WCAG accessibility code violations** surfaced in an application wide audit, leading to the core product’s successful WCAG 2.1 certification.

SKILLS

Javascript

CSS / SCSS

Cypress / Playwright

Familiarity with C# .NET

Typescript

Build Tooling (Vite, NX)

GraphQL

SQL

React

UI / UX Design

CI/CD Pipeline Devops

People Management

WCAG 2 AA+

Automated Testing (Unit, e2e)

Redux

Accessibility Testing
