WORK EXPERIENCE

Fieldtech | Senior Front End Software Engineer | Tech Lead Manager

May 2023 - Present

- Leading UI design and development for a blossoming insurtech startup, utilizing React, Typescript, Javascript, and GraphQL.
- Managing a small team of direct reports.
- Acting as the “go to” resource for all things front end development by providing thorough and empathetic code review, pair programming, documentation, design review, and architecture guidance.
- Designed, authored, and launched an accessible, full featured React interactive data table from scratch, replacing over 30 deprecated 3rd party table instances across the application.
- Refactored heavy custom form logic to React Hook Form and Zod object schema validation to improve maintainability and developer experience.
- Led product research efforts by developing and presenting two key POC front ends for AI integrated greenfield projects, both becoming core offerings in our product suite.
- Sharpening my back end and data skills by delving into C# .NET and SQL on an increasing basis.

Coterie Insurance | Front End Software Engineer

August 2021 - September 2022

- Led front end development of an intuitive Domain Specific Language UI using React and Typescript that enabled underwriters to construct error free underwriting rules with minimal syntax knowledge.
- Spearheaded creation and enforcement of accessibility standards by collaborating with designers, reviewing code, and committing to baking accessibility into new UI components.
- Core greenfield UI developer for a mission critical feature that provided insurance agents with a data intelligent “2 click” quote flow.
- Mentored peer engineers by pairing, reviewing code, and holding monthly 1:1s with junior developers to provide career and technical guidance.

Brushfire | Front End Software Engineer

February 2021 - August 2021

- Used React, Redux, Typescript, and Firebase to modernize a legacy C# Razor / jQuery codebase in the online event and livestreaming industry.
- Crafted an automated pre-commit code quality enforcement solution for a complex multi-language mono-repo.

Blue Toad | Front End Software Engineer

August 2019 - July 2020

- Engineered certified WCAG 2.1 compliant digital publication UI features using React, jQuery, and Javascript.

SKILLS

Javascript
CSS / SCSS
Cypress / Playwright
Familiarity with C# .NET
A/B Testing
React Query

Typescript
Semantic HTML
Unit Testing
Familiarity with SQL
Node
WCAG

React
Build Tooling (Vite, NX)
Code Review / Mentorship
Jest
Redux
Integration Testing

GraphQL
UI / UX Design
React Testing Library
People Management
Quality Assurance
